## DC COMMON MODE FILTER

### FEATURES

- A chip-type common mode filter for large current applications. Common mode impedance surpasses 500  $\Omega$  at 100MHz. Noise is greatly suppressed.
- Capable of handling the highest current (up to 2.2A) of any chip-type common mode filter.
- Height and size have been considered, resulting in a compact and light-weight choke coil. Applicable for the miniaturization required to reduce the size and weight of portable equipment.
- The products contain no lead and also support lead-free soldering.
- The product does not contain regulated substances that are slated to be included in ROHS.

### APPLICATIONS

Used for power line noise suppression for any electronic devices  
Used to counter adapter/battery line noise for relatively large electronic devices such as notebook PCs, stand-alone word processors, etc

### TEMPERATURE RANGES
